## **DETAILED ACTION**

### ***Examiner's Amendment***

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

1. In claim 27 at line 2, "furtther" has been changed to --further--.

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 5, 2008 has been entered.

Claims 1, 27 and 29-57 are pending.

### ***Election/Restrictions***

Claims 1, 27, 29, 31-34, 42, 49, 50, 56 and 57 are allowable. Claims 30, 35-41, 43-48 and 51-55, previously withdrawn from consideration as a result of a restriction requirement, require all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP §

821.04(a), **the restriction requirement between inventions 1-9, as set forth in the Office action mailed on March 31, 2007, is hereby withdrawn** and claims 30, 35-41, 43-48 and 51-55 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

***Claim Rejections - 35 USC § 102 and 103***

The rejection of claims 1, 27-29, 42, 44, 49 and 56 under 35 U.S.C. 102(b) based on Ishida (U.S. Pat. 5,270,129) has been withdrawn.

The rejection of claims 32-34 under 35 U.S.C. 103(a) based on Ishida and Khandkar et al. (U.S. Pat. 5,712,055) has been withdrawn.

In withdrawing the rejections of record, the examiner notes the amendment to the present claims which further define that the flat walls having exterior surfaces are porous so that during operation fuel flows through the walls to contact the solid oxide fuel cells. Ishida teaches away from having porous walls since "diffusion resistance of fuel gases passing through porous supports" results in a high "internal resistance in the cells." See col. 2 line 47 et seq. The supports in Ishida are disclosed as spacers [12] and [14] which function to contain the fuel gases

along the path indicated by arrows in Figure 5 and Figure 6. The examiner notes applicant's citation of page 5 of the specification which discloses in relevant part that "[t]he hollow members 14 are porous to allow fuel to flow to the solid oxide fuel cells 20."

### ***Allowable Subject Matter***

Claims 31 and 50 are allowed for the reasons set forth in a prior Office action.

Claims 1, 27, 29, 30, 32-49 and 51-57 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest the instant invention regarding a solid oxide fuel cell stack being arranged on flat exterior surfaces of an elongate hollow module which are porous to allow fuel to flow through its walls to contact the solid oxide fuel cells.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Pat. 5,175,063 is cited to teach a porous partition [4]. U.S. Pat. 5,486,428 is cited to teach manifolds [18].
